

AGRI-HORTICULTURE NETS

100% HDPE
knitted-construction nets,
designed for multiple
applications:

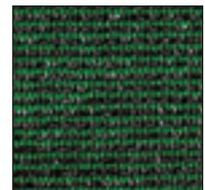

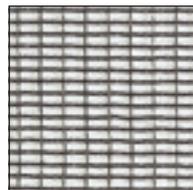

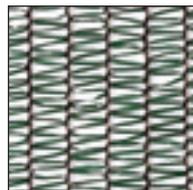

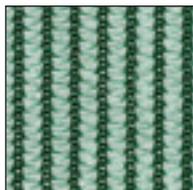

- Anti-hail
- Bird & Insect Protection
- Windbreaking
- Olive Collection
- Shade

RELIABLE SOLUTIONS FOR PROTECTION, HARVESTING AND SHADING

UV STABILISED, **STRONG AND DURABLE** NETS TO MEET **THE MOST DEMANDING** AGRICULTURAL NEEDS

- **Antihail Nets** protect cultivations from hail damages, while **allowing light, moisture and air to permeate** – various types available, with different knitting patterns, to **alter the percentage of protection**.
- **Bird Protection Nets** protect crops and plants against bird invasion and ensure a **healthy environment, free of bird infestations**.
- **Insect Protection Nets** protect against the depredations of insects, birds or even mammals and also assure bee exclusion to **prevent cross pollination**.
- **Shading Nets** reduce the sun rays and create an **ideally protected micro-climate** for trees, plants and flowers to thrive – various types available, with different knitting patterns, to **alter the percentage of irradiation**.
- **Windbreaker Nets** protect from **micrometeorological modifications** of cool weather that damage crops and plants due to influenced turbulent characteristics.
- **Olive Collection Nets** are the cost-efficient solution for **quick and easy harvesting**, securing intact crops, and can be **used over several yielding seasons**.
